

Course name	Fabric Moulding
Entity running the course	Faculty of Interior Architecture and Design
Entity for which the course has been prepared	Department of Design
Course type	specialty, obligatory course
Year of study / semester, type of studies	Year I, sem. II, full-time bachelor's degree
ECTS credits	2 pts ECTS per semester
Academic tutor	lect. Rafał Tumanowicz, MFA
Aim of the course	The aim of this course is to teach students about the use of basic modelling materials, such as paper and wood.
Prerequisites	Basic knowledge about characteristic features of various fabrics.
Learning outcomes:	
- knowledge	Student gains knowledge about methods of working with different materials. Can use knowledge of basic physical laws in their design work (gravitation and kinetics).
- skills	Student develops observational skills and learns to inspire themselves with specific qualities of a given material.
- personal and social competence	

Course content	Students design basic functional objects, taking into consideration specific qualities of a material they're about to use.
Course form and number of course hours	consultations, reviews, group work
Assessment methods and criteria	50% executing assignments / active participation in classes / creativity 50% open review
Assessment type	graded pass
Literature	
Teaching aids	
Language of instruction	Polish, French
